

POWERSPORTS FUELS — FOR ALL OF YOUR TWO AND FOUR WHEEL NEEDS

MXR 4T

MXR 4T is a popular choice among both weekend riders and serious professionals. Specifically designed as a pour in alternative to pump gas, the increase in reliability and throttle response makes T4 a great alternative to pump fuel.

MXR 4T is an unleaded, non-ethanol fuel that can be used in all 2 wheel applications, SXS, Quads and any other off road vehicles utilized in competition.

MXR 2

For the most serious of 2 Stroke Competitors looking for that competitive Edge, MXR 2 is the fuel of choice.

For use in any powersports applications, stock or highly modified, MXR 2 is a leaded and oxygenated fuel providing a significant increase in power and protection. Some Jetting or additional tuning will be required.

2WL

Fuel Factory 2WL is an unleaded, oxygenated fuel producing more HP and Torque than any other powersports fuel on the market today.

Offering maximum performance for your 4-stroke application, 2 WL is recommended by top level engine builders and tuners. Additional Jetting and Tuning will be required.

MX PRO

Fuel Factory's MX Pro is a fuel designed for the most serious, high level of MX and SX riders. This AMA legal fuel meets the rigorous demands these riders need to fight their way to the top of the podium.
